Project Title: iPod Website

Wikipedia link: https://en.wikipedia.org/wiki/IPod

I think that this website should have an opening landing page with general information, then have multiple subpages that showcase things like the culture behind iPods and the various models and hardware specs. I think there is a lot of content and I may even want to hone in my focus to a specific iPod like 5th gen if it is too broad.

- **Home Page/Introduction** – A really large introduction title and subtitle with plenty of breathing room followed by a basic overview paragraph upon scrolling down
- **History** - An expanded version of the paragraph in the introduction that goes into more detail about the product
- **Hardware** - Showcases all models of the iPod with drop down menus with more information when hovering over them.
- **Software** - Shows the various applications you could have on your iPod, maybe I can even replicate the feel/look of navigating an iPod on this page.
- **iPod Advertizing** - This would be in the style of the silhouette ad with maybe an expanded scope to include the cultural impact of the iPod.
- **Criticism/Legacy** - Talks about the labor disputes about iPod assembly and the death of mp3 players with streaming music.
- **Sources** – this page will just list sources, including the Wikipedia page, as well as other sources for photography, and any other credits that need to be provided.
